## EXECUTIVE SUMMARY

Diana Dominguez is a Realtor at Signature Properties in Little Rock, AR, specializing in military PCS relocations. She serves a niche but high-turnover market where response speed and personal connection drive conversions.

This blueprint identifies the highest-impact opportunities for AI adoption in her business, ranked by revenue impact and ease of implementation. The recommended starting point is an AI Front Desk - a managed lead-response system that acknowledges every incoming lead within seconds, qualifies intent, and hands off warm prospects to Diana for the personal touch she excels at.

Recommended starting tier: AI Front Desk - Starter Plan (\$799/mo, first month free)

## BUSINESS PROFILE

- **Company:** Signature Properties - Little Rock, AR
- **Agent:** Diana L. Dominguez, Realtor (14 years experience)
- **Niche:** Military PCS families relocating to/from Little Rock
- **Website:** pcsingtolittlerock.com
- **Contact:** 325.829.2839 | diana.dominguez@icloud.com
- **Core Activities:** Lead response, showing intake, buyer/seller follow-up, PCS guidance
- **Capacity:** 8-11 active clients at peak season

## CURRENT STATE ASSESSMENT

Based on the onboarding interview, Diana's current workflow is manual across the board:

- Leads come from her website only - she responds manually to each
- She has written response templates (warm, casual tone) but copies/pastes them by hand
- No CRM is in use - lead tracking lives in her inbox and text messages
- Social media content is created ad-hoc with no scheduling or calendar - her biggest time sink
- Past client follow-up is inconsistent - no automated nurture system
- No after-hours or weekend lead coverage
- Calendar (Cozi) and email (Yahoo/iCloud) can't connect to automation tools

Key gap: 78% of real estate sales go to the first-responding agent (NAR 2025). Diana cannot sustain sub-5-minute response times while managing 8-11 active clients.

## AI RECOMMENDATIONS

---

Ranked by revenue impact and implementation ease. Each maps to a specific AI Employee role.

### 1. AI Front Desk - Lead Response Automation (Priority: Critical)

An AI-powered lead responder that acknowledges every new lead within seconds, 24/7, using Diana's existing warm tone. Qualifies intent (buying vs renting, timeline, orders status) and escalates to Diana for personal follow-up.

- **Tone:** Diana's existing message style - friendly, warm, imperfect
- **Channels:** Covers website chat, Facebook Messenger, Instagram DM, and SMS
- **Impact:** Every lead acknowledged in under 60 seconds
- **Escalation:** Diana reviews all qualified leads before any commitment is made

### 2. AI Follow-Up Coordinator - Lead Nurturing & Tracking (Priority: High)

Tracks conversations and sends timely follow-ups when Diana is busy with showings. Prevents leads from going cold during busy weeks.

- **Features:** Automated lead routing with touchpoint tracking and follow-up sequences
- **Also included:** Email triage with draft replies ready for Diana's review
- **Impact:** No lead falls through the cracks during busy showing weeks

### 3. AI Social Media Manager - Content & Scheduling (Priority: Medium)

Automated content generation and scheduling. Creates posts from listings, market reports, and PCS-specific content, then schedules across Facebook, Instagram, and TikTok.

- **Features:** Unlimited post creation, listing-to-social conversion, editorial calendar
- **Impact:** Consistent online presence without hours of manual content creation
- **Output:** 4 scheduled posts per week (minimum), plus listing-specific content

### 4. AI Past-Client Nurture - Referral Engine (Priority: Medium)

Automated monthly home value reports for past clients. 64% of sellers would reuse their agent but only 25% do - usually because the agent stopped reaching out.

- **Features:** Automated monthly equity reports and market updates sent to past clients
- **Impact:** Referral generation from satisfied military families who PCS every 2-3 years

## YOUR CURRENT SETUP

Based on your onboarding form, here's what you're using today and our recommended upgrades. Tools marked 'keep' are already good - we'll connect them to the AI workflows.

| Category     | Current Tool           | Action   | Recommendation                                |
|--------------|------------------------|----------|-----------------------------------------------|
| Email        | Yahoo / iCloud         | Upgrade  | Professional email that works with automation |
| Calendar     | Cozi                   | Upgrade  | Connects to your CRM and AI tools             |
| CRM          | None                   | Add      | Lead tracking, routing, follow-up sequences   |
| Showings     | ShowingTime            | Keep     | Industry standard, included with MLS          |
| Transactions | Form Simplicity        | Keep     | Free via association, handles e-signatures    |
| Social Media | Manual (all platforms) | Automate | Auto-respond + schedule content               |
| Website      | pcsingtolittlerock.com | Keep     | Add AI lead capture, keep the site            |

Key insight: 5 of your 7 tools are keepers. We're adding a CRM + automation, not replacing your workflow.

## UPGRADE DETAILS

### Calendar: Cozi to Google Calendar

Cozi is a great family organizer, but it doesn't connect to CRM, showing tools, or AI assistants. Google Calendar is free and works with all your business tools. Your Cozi stays active for family stuff - we just move business scheduling to Google.

- **Google Calendar:** Free, industry standard
- **Calendly (\$0-\$16/mo):** Client self-scheduling with auto-timezone (great for PCS families overseas)

### Email: Yahoo/iCloud to Professional Inbox

Personal email providers can't connect to automation tools. We recommend a professional inbox that connects to your CRM and AI tools. Your Yahoo/iCloud stays active - we forward everything.

- **Google Workspace:** Professional email + calendar + drive (\$7.80/mo)
- **Or:** Free option - forward Yahoo to new inbox, keep old address for personal use

### CRM: Adding Your First (Currently None)

You noted you 'should' use a CRM. That's the single biggest gap in your workflow right now. A real estate CRM tracks every lead, automates follow-ups, and ensures nothing slips through.

- **Recommended:** Built for real estate, best ROI for solo agents
- **Alternative:** Simpler/cheaper but less real estate-specific

Good news: Your ShowingTime and Form Simplicity accounts link directly to the new CRM. Showing requests are tracked automatically. Transaction paperwork is filed when deals go to contract.

## IMPLEMENTATION ROADMAP

Start with one high-value workflow, then expand once Diana trusts the handoff.

### Phase 1 - AI Front Desk (Week 1-2)

- Configure lead response on website + Facebook + Instagram
- Set up lead qualification flow using Diana's message templates
- Establish escalation rules - all situations reviewed by Diana before commitment
- Test with real leads, refine tone and questions

### Phase 2 - Follow-Up System (Week 3-4)

- Set up CRM with lead routing and automated sequences
- Connect email assistant to Diana's inbox for triage
- Migrate calendar to Google, connect to CRM and showing tools
- Create automated follow-up sequences for different lead stages

### Phase 3 - Social & Nurture (Week 5-6)

- Configure social content engine with Diana's branding
- Set up past-client monthly reports
- Launch content calendar with first month of scheduled posts
- Link Form Simplicity so transactions are created from CRM deals automatically

## INVESTMENT SUMMARY

| Service Tier                 | Monthly Fee       | What You Get                            |
|------------------------------|-------------------|-----------------------------------------|
| <b>Starter (Recommended)</b> | \$799 - \$1,500   | 1 AI role, monthly review               |
| Ops Assistant (Popular)      | \$2,000 - \$3,500 | Multiple workflows, weekly optimization |
| AI Department                | \$5,000+          | Full AI team, priority support          |

First month FREE | 10% military discount | No contracts

## NEXT STEPS

- **Step 1:** Review this blueprint and note any questions or adjustments
- **Step 2:** Schedule a 30-minute strategy call to finalize the first workflow
- **Step 3:** RDL installs and configures the AI Front Desk (Phase 1)
- **Step 4:** Test with real leads for one week - your first month is free
- **Step 5:** Review results together and decide on Phase 2 expansion
